

COLORADO MILL EQUIPMENT ECO-C SERIES PELLET COOLERS

Colorado Mill Equipment's C series pellet coolers come in three sizes: the C3, with a capacity of 1-3 tons/hr, the C5, with a capacity of 3-5 tons/hr, and the C10, with a capacity of 5-10 tons/hr, depending on pellet size, density, temperature and composition. They are commonly used to cool pellets from 1/32" to 1/2" diameter, and from up to 250°F to within ~15° of ambient.

FEATURES:

- Modern, most efficient design
- Variable swing discharge grid (1000 x 1000mm, 1200 x 1400mm, and 1900 x 1900mm)
- Octagonal easy-view design on C5 and C10
- Easy maintenance, heavy-duty construction
- Clear view chamber door design
- Optimal efficiency counterflow
- All NEMA frame motors
- Level sensor included

OPTIONS:

- 7½HP - 25HP blower
- Cyclone with stand
- Cyclone airlock valve with sight glass
- Single-deck pellet screener
- Duct work
- Rotary airlock valve inlet
- Air dampening valve

ECO-C SERIES PELLET COOLERS

The ECO-C series pellet coolers are commonly used to cool the following pellets:

- Animal Bedding
- Animal Feed
- Biomass
- Cardboard
- Chemicals
- Fertilizer
- Hops
- Paper
- Plastic
- Recycling
- Wood Pellets

SPECIFICATIONS:

Model:	C3	C5	C10
Voltage:	230/460VAC		
Discharge Grid Motor:	1HP	2HP	2HP
Screener Motor:	1/4HP	1/4HP	N/A
Blower Motor:	7.5HP	15HP	25HP
Airlock Motor:	1HP		
Rotary Valve Motor:	1HP
