

COLORADO MILL EQUIPMENT

PELLET MILL FEEDERS AND CONDITIONERS

Product conditioning is a critical part of the wood, feed, biomass and aggregate pelleting process, and the design and type of equipment used to condition the product must be matched to the application to maximize efficiency.

CONDITIONER:

- 7.5 HP; dual voltage NEMA rated conditioner motor
- 17" I.D x 74" Long Stainless Steel conditioner body
- 14' x 14" infeed opening
- 6" x 9" outfeed dimensions
- Stainless Steel adjustable angle paddles to adjust product retention time
- Stainless Steel agitator shaft
- Outfeed temperature gauge
- Belt drive design for low maintenance
- Split belt guard cover for fast, easy removal
- Hinged clean-out door with Destaco type clamps
- Heavy duty bearings with protective cover
- Unimount conditioner mounting base that can be easily adapted to most pellet mills on the market
- Product inspection port
- Steam/moisture port

CME

COLORADO MILL EQUIPMENT

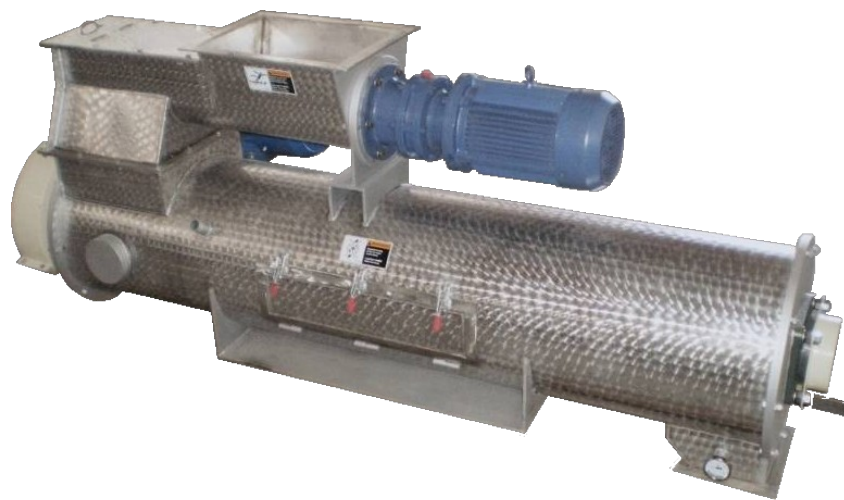

PELLET MILL FEEDERS AND CONDITIONERS

The CME Pellet Mill Feeder / Conditioner is designed to work with most pellet mills including CPM, Sprout and Bliss.

FEEDER:

- Stainless Steel construction
- Direct drive
- Cycloidal gear reducer
- 3HP; dual voltage NEMA rated feeder motor
- 36"Long x 8"Wide variable pitch screw
- 15" x 11.5" infeed opening
- Hinged inspection cleanout door
- Heavy duty bearings with protective cover
